Leading a discussion session
at the 5th Cloud Control Workshop

Each discussion session includes a few topics to be discussed in parallel.

A discussion topic leader is expected to:

- Introduce the topic. This may range from explaining the area in one minute to giving a short (say 10-minutes presentation)
- Prepare and present a few questions to be discussed regarding the topic.
- To chair the discussion and make sure the group makes progress
- Present the main conclusions in a joint workshop session at some point in time after the discussions.
- Write an "abstract-style" summary of the discussion short after the session (but just brief, say 150 – 250 words)
