

Some practicalities

The hotel has received a list of all participants and makes room assignments before our arrival to ensure a smooth procedure. Normal check-in time is 15.00 but with a bit of luck, some of you may be able to check in before that.

Internet is available in the conference facility, but availability is less certain in the hotel area. (I have received a bit conflicting info for the hotel - it may be available in the lounges but not in the rooms, or not at all.) To complement this, we are bringing two 3G/4G routers with contracts for unlimited data volumes

Skiing conditions and practicalities

As you have seen from the agenda we have a break from 12 to 16 everyday, starting with lunch at 12 and ending with coffee just before 16. This will allow for up to three hours of afternoon skiing for people being quick at lunch and without need for other work between sessions.

- The hotel is located directly on the skiing slope.
- Skiing equipment can be rented both at the hotel and downhill), at the start of the nearest lift (same operator).
- Currently, there is 70 cm of snow in Hemavan and 47 cm in the prepared slopes. As of today, 29 out of 31 slopes were open and 9 out of ten lifts were open.
